

List of Contents

NUMBER 1

- | | | |
|--|----|--|
| Ali Amiri and Reza Barkhi | 1 | The multi-hour bandwidth packing problem |
| George J. Kyparisis and Christos Koulamas | 15 | Open shop scheduling with makespan and total completion time criteria |
| Mondher Hachicha, M. John Hodgson, Gilbert Laporte and Frédéric Semet | 29 | Heuristics for the multi-vehicle covering tour problem |
| Lushu Li and K.K. Lai | 43 | A fuzzy approach to the multiobjective transportation problem |
| Bhaba R. Sarker, A.M.M. Jamal and Shaojun Wang | 59 | Supply chain models for perishable products under inflation and permissible delay in payment |
| James Boyd Bankston and R. Michael Harnett | 77 | An heuristic algorithm for a multi-product, single machine capacitated production scheduling problem |

NUMBER 2

- | | | |
|--|-----|---|
| Donald E.K. Martin | 93 | On the distribution of the number of successes in fourth- or lower-order Markovian trials |
| Ali Allahverdi | 111 | Minimizing mean flowtime in a two-machine flowshop with sequence-independent setup times |
| Ming-Sang Chang, Deng-Jyi Chen, Min-Sheng Lin and Kuo-Lung Ku | 129 | The distributed program reliability analysis on star topologies |
| Jian Ma, Peng Tian and Dong-Mo Zhang | 143 | Global optimization by Darwin and Boltzmann mixed strategy |
| Ignacy Kaliszewski | 161 | Using trade-off information in decision-making algorithms |
| Angel Corberán, Rafael Martí and Antonio Romero | 183 | Heuristics for the Mixed Rural Postman Problem |

NUMBER 3

- | | | |
|---|-----|--|
| Lawrence Bodin and
Eddie Epstein | 205 | Who's on first-with probability 0.4 |
| Asher Tishler and
Stan Lipovetsky | 217 | Modelling and forecasting with robust canonical analysis: method and application |
| A. Kharab | 233 | An advanced macro spreadsheet program for the simplex method |
| R. Östermark | 245 | A flexible multicomputer algorithm for elementary matrix operations |
| Bong Dae Choi, Bara Kim
and Sung Ho Choi | 269 | On the M/G/1 Bernoulli feedback queue with multi-class customers |
| Wun-Hwa Chen and
Chin-Shien Lin | 287 | A hybrid heuristic to solve a task allocation problem |

NUMBER 4

- | | | |
|---|-----|---|
| Roy Gelbard and
Israel Spiegler | 305 | Hempel's Raven paradox: a positive approach to cluster analysis |
| Z.G. Zhang and C.E. Love | 321 | A simple recursive Markov chain model to determine the optimal replacement policies under general repairs |
| N.E. Abboud, M.Y. Jaber and
N.A. Noueihed | 335 | Economic lot sizing with the consideration of random machine unavailability time |
| Martin J. Fischer,
Carl M. Harris and
Jennifer Xie | 353 | An interpolation approximation for expected wait in a time-limited polling system |
| Jin Woo Lee and
Soung Hie Kim | 367 | Using analytic network process and goal programming for interdependent information system project selection |
| Fayez F. Boctor and
Jacques Renaud | 383 | The column-circular, subsets-selection problem: complexity and solutions |

NUMBER 5

- | | | |
|---|-----|---|
| Sheng-Pen Wang and
Kenneth L. Judd | 399 | Solving a savings allocation problem by numerical dynamic programming with shape-preserving interpolation |
| Yusen Xia, Baoding Liu,
Shouyang Wang and K.K. Lai | 409 | A model for portfolio selection with order of expected returns |
| Sehun Kim and Jae-In Kim | 423 | An adaptive time slot assignment algorithm for variable bandwidth switching systems |
| Sal Agnihothri, Ji Soo Lee
and Jeongseob Kim | 437 | Lot sizing with random yields and tardiness costs |
| I. Kuban Altinel, Necati Aras
and B. John Oommen | 461 | Fast, efficient and accurate solutions to the Hamiltonian path problem using neural approaches |

NUMBER 6

- | | | |
|--|-----|--|
| B.C. Giri, T. Chakrabarti and
K.S. Chaudhuri | 495 | A note on a lot sizing heuristic for deteriorating items with time-varying demands and shortages |
| A.J.V. Skriver and
K.A. Andersen | 507 | A label correcting approach for solving bi-criterion shortest-path problems |
| Hemant V. Kher | 525 | Examination of worker assignment and dispatching rules for managing vital customer priorities in dual resource constrained job shop environments |
| W. Wang | 539 | A model of multiple nested inspections at different intervals |
| Jean-Marie Bourjolly,
Gilbert Laporte and
Gilles Pesant | 559 | Heuristics for finding <i>k</i> -clubs in an undirected graph |
| Maciej Drozdowski and
Paolo Dell'Olmo | 571 | Scheduling multiprocessor tasks for mean flow time criterion |
| Jaydeep Balakrishnan and
Chun Hung Cheng | 587 | Genetic search and the dynamic layout problem |

ARTIFICIAL INTELLIGENCE AND DECISION SUPPORT WITH MULTIPLE CRITERIA

Samuel J. Raff	595	Preface
Constantin Zopounidis	597	Foreword
Minghe Sun, Antonie Stam and Ralph E. Steuer	601	Interactive multiple objective programming using Tchebycheff programs and artificial neural networks
J. Teghem, D. Tuytens and E.L. Ulungu	621	An interactive heuristic method for multi-objective combinatorial optimization
Ertunga C. Özelkan and Lucien Duckstein	635	Multi-objective fuzzy regression: a general framework
Nikos Karacapilidis and Costas Pappis	653	Computer-supported collaborative argumentation and fuzzy similarity measures in multiple criteria decision making
R. Bisdorff	673	Logical foundation of fuzzy preferential systems with application to the electre decision aid methods
Nikolaos F. Matsatsinis and Andreas P. Samaras	689	Brand choice model selection based on consumers' multicriteria preferences and experts' knowledge
Kaisa Miettinen and Marko M. Mäkelä	709	Interactive multiobjective optimization system WWW-NIMBUS on the Internet
C. Bielza, M. Gómez, S. Ríos-Insua and J.A. Fernández del Pozo	725	Structural, elicitation and computational issues faced when solving complex decision making problems with influence diagrams
Gerard Colson	741	The OR's prize winner and the software ARGOS: how a multijudge and multicriteria ranking GDSS helps a jury to attribute a scientific award

- | | | |
|---|------------|--|
| V. Mousseau, R. Slowinski
and P. Zielniewicz | 757 | A user-oriented implementation of the ELECTRE-TRI method integrating preference elicitation support |
| Constantin Zopounidis
and Michael Doumpos | 779 | PREFDIS: a multicriteria decision support system for sorting decision problems |
| Evangelos Grigoroudis,
Yannis Siskos and
Olivier Saurais | 799 | TELOS: a customer satisfaction evaluation software |

NUMBER 9

- | | | |
|---|------------|--|
| Safaai Deris, Sigeru Omatu
and Hiroshi Ohta | 819 | Timetable planning using the constraint-based reasoning |
| Linet Özdamar and
Melek Demirhan | 841 | Experiments with new stochastic global optimization search techniques |
| Guangting Chen and
Guochuan Zhang | 867 | A constrained minimum spanning tree problem |
| Antonio G.N. Novaes,
José E. Souza de Cursi
and Odacir D. Gracioli | 877 | A continuous approach to the design of physical distribution systems |
| Gülay Barbarosoğlu
and Linet Özdamar | 895 | Analysis of solution space-dependent performance of simulated annealing: the case of the multi-level capacitated lot sizing problem |
| Jacques Renaud,
Fayez F. Boctor and
Jamal Ouenniche | 905 | A heuristic for the pickup and delivery traveling salesman problem |

NUMBER 10

- | | | |
|--|------------|---|
| Ravindra K. Ahuja,
James B. Orlin and
Ashish Tiwari | 917 | A greedy genetic algorithm for the quadratic assignment problem |
| Jing-Shing Yao,
San-Chyi Chang and
Jin-Shieh Su | 935 | Fuzzy inventory without backorder for fuzzy order quantity and fuzzy total demand quantity |

Hepu Deng, Chung-Hsing Yeh and Robert J. Willis	963	Inter-company comparison using modified TOPSIS with objective weights
Dar-Li Yang and Maw-Sheng Chern	975	Two-machine flowshop group scheduling prob- lem
C.K.Y. Lin, K.F. Lai and S.L. Hung	987	Development of a workforce management system for a customer hotline service

Technical Note

Ching-Ter Chang and Chi-Chiao Chang	1005	A linearization method for mixed 0-1 polynomial programs
--	------	---

NUMBERS 11-12

NEURAL NETWORKS IN BUSINESS

Samuel Raff	1017	Preface
Jatinder N.D. Gupta and Kate A. Smith	1019	Foreword
Kate A. Smith and Jatinder N.D. Gupta	1023	Neural networks in business: techniques and applications for the operations researcher
Bo K. Wong, Vincent S. Lai and Jolie Lam	1045	A bibliography of neural network business applications research: 1994-1998
Caron H. St. John, Nagraj Balakrishnan and James O. Fiet	1077	Modeling the relationship between corporate strategy and wealth creation using neural net- works
Mark T. Leung, An-Sing Chen and Hazem Daouk	1093	Forecasting exchange rates using general regression neural networks
Luvai Motiwalla and Mahmoud Wahab	1111	Predictable variation and profitable trading of US equities: a trading simulation using neural networks
David West	1131	Neural network credit scoring models
Mary R. Lind and Joanne M. Sulek	1153	A methodology for forecasting knowledge work projects
R. Patterson and H. Pirkul	1171	Heuristic procedure neural networks for the CMST problem

- | | | |
|---|------|--|
| Nicola Secomandi | 1201 | Comparing neuro-dynamic programming algorithms for the vehicle routing problem with stochastic demands |
| Thomas Reutterer and Martin Natter | 1227 | Segmentation-based competitive analysis with MULTICLUS and topology representing networks |

NUMBER 13

- | | | |
|--|------|---|
| F. Baita, R. Pesenti, W. Ukovich and D. Favaretto | 1249 | A comparison of different solution approaches to the vehicle scheduling problem in a practical case |
| T.-J. Chang, N. Meade, J.E. Beasley and Y.M. Sharaiha | 1271 | Heuristics for cardinality constrained portfolio optimisation |
| Mario Conrado Cavichia and Marcos Nereu Arenales | 1303 | Piecewise linear programming via interior points |
| Osman Kazan, Rakesh Nagi and Christopher M. Rump | 1325 | New lot-sizing formulations for less nervous production schedules |
| Dennis Ridley | 1347 | Complementary antithetic weights for log-normal time-series forecasting |
| Note | | |
| David P. Jacobs, John C. Peck and J. Steve Davis | 1351 | A simple heuristic for maximizing service of carousel storage |

NUMBER 14

- | | | |
|---|------|--|
| Christian Hofmann | 1357 | Supplier's pricing policy in a Just-in-Time environment |
| Young-Myoung Kim, Jai-Hyun Kim and Soung-Hie Kim | 1375 | Use of multi-attribute decision analysis for designing operations system framework in telecommunications management network |
| Gyu C. Kim and John Emery | 1389 | An application of zero-one goal programming in project selection and resource planning – a case study from the Woodward Governor Company |
| Konstantin Kogan | 1409 | Scheduling concurrent production over a finite planning horizon: polynomially solvable cases |
